IMPORTANT PRE-CONSTRUCTION NOTICE

TO SUEZ CUSTOMERS WITHIN THE TOWNSHIP OF BERKELEY NEIGHBORHOODS OF:

**BEDIVERE COURT, BRUSSELS COURT, BURLINGTON COURT, DUPONT COURT,
HAMPSHIRE COURT, PALA STREET, ST. ANDREWS COURT, WALESIA COURT,
AND WILTSHIRE COURT**

**SUEZ CUSTOMERS SHOULD PREPARE
FOR TEMPORARY INTERRUPTIONS OF WATER SERVICE**

NOVEMBER 6, 2017 THROUGH DECEMBER 31, 2017

Dear Valued SUEZ Customer:

As part of our continuing commitment to serve you with safe and reliable water supplies, SUEZ will begin installation of new water mains and renewing water services in the neighborhoods of **BEDIVERE COURT, BRUSSELS COURT, BURLINGTON COURT, DUPONT COURT, HAMPSHIRE COURT, PALA STREET, ST. ANDREWS COURT, WALESIA COURT AND WILTSHIRE COURT** over the next several weeks (from approximately November 6, 2017 through December 31, 2017) with an anticipated restoration phase by Spring 2018.

Construction procedures have been developed to minimize disruption of service, and SUEZ will be working in conjunction with its contractor, J. F. Kiely Construction Company. The project comprises the replacement of approximately 4,550 feet of 8-inch ductile iron water pipe and 750 feet of 6-inch ductile iron water pipe. Anticipated work schedules are weekdays from 7 AM through 5 PM, daily and Saturdays from 9 AM through 4 PM. The construction work for each cul-de-sac includes connection of water mains on the following streets: Cabrillo Boulevard, Encinitas Drive, Hampshire Road, Millbrook Drive, Oakfield Road, Ramona Drive, and Westport Drive.

SUEZ recognizes that temporary water service shutdowns are inconvenient, and we apologize, but please understand that this project enables SUEZ to enhance water quality, service and sustainably manage its water systems. Please rest assured that specific dates and times for temporary water shutdowns will be communicated, in advance, to each resident affected by the project.

Please note that to allow for safe movement of vehicular and pedestrian traffic during the project, appropriate local law enforcement will be assisting at the work sites to ensure the safety of residents and workers.

In preparation for each temporary shutdown and to minimize the disruption, SUEZ recommends that customers fill containers with water for drinking and cooking. Customers can also fill sinks or bathtubs and use that water for washing and flushing the toilet. Customers may experience discolored water during and shortly after the shutdown. These are harmless minerals that have accumulated in the mains, and while the water is safe to drink, customers should run their cold water tap for approximately five (5) minutes or until the water is clear.

Every effort will be made to ensure that water service is restored in a timely manner and, again, we apologize for any inconvenience as we work to ensure water quality and service reliability efficiencies. If you have any questions or concerns regarding the project, please contact SUEZ at 732-349-0227.

Sincerely,

Your SUEZ Operations and Engineering Teams
